

Legal decision: Portuguese court rules PCR test as unreliable

Description

The PCR test *"is unable to determine, beyond reasonable doubt, that a positive result corresponds, in fact, to the infection of a person by the SARS-CoV-2 virus"*, stated the Lisbon Court of Appeal on 11 November 2020.

Proc. N^o 1783/20.7T8PDL.L1

[PROCESSO N.º 1783/20.7T8PDL.L1-3](#)

Most importantly, the judges decided that a single positive PCR test cannot be used as an effective diagnosis of infection. If this decision is a precedent remains an open question.

The judges referred to the following publication:

Surkova, E., Nikolayevskyy, V., & Drobniowski, F. (2020). False-positive COVID-19 results: hidden problems and costs. *The Lancet Respiratory Medicine*, 8(12), 1167–1168. [doi.org/10.1016/S2213-2600\(20\)30453-7](https://doi.org/10.1016/S2213-2600(20)30453-7)

Fulltext: [www.thelancet.com/journals/lanres/article/PIIS2213-2600\(20\)30453-7/fulltext](https://www.thelancet.com/journals/lanres/article/PIIS2213-2600(20)30453-7/fulltext)

In Germany this judgement is now debated (obviously not by the mainstream media – they prefer to ignore it as long as possible), but see: www.br.de/nachrichten/deutschland-welt/faktenfuchs-irrefuehrende-meldungen-ueber-pcr-urteil-in-portugal,SHo3NIm
