

YouTube warns: #Saveyourinternet

Description

YouTube states:
“Article 13, as written by the European Parliament, will create large unintended (???) consequences for everyone. Let’s come together for a better solution.” (content in brackets added)

Further YouTube states:

“Article 13 – There’s a better way
Article 13 is part of European copyright legislation created with the intent to better protect creativity and find effective ways for copyright holders to protect their content online.

We support the goals of Article 13, but the version written by the European Parliament could have large unintended consequences that would change the web as we know it.”
