

The Corona Fraud: A crime against humanity with extensive legal consequences

Description

You can find the German version below...

Publication: Bulletin of the World Health Organization; Type: Research Article ID: BLT.20.265892 Page 1 of 37; Author: John P A Ioannidis

Conclusion: The infection fatality rate of COVID-19 can vary substantially across different locations and this may reflect differences in population age structure and case-mix of infected and deceased patients and other factors. The inferred infection fatality rates tended to be much lower than estimates made earlier in the pandemic.
