

multidiciplinary.ml

Description

Interdisciplinarity or interdisciplinary studies involves the combining of two or more [academic disciplines](#) into one activity (e.g., a research project).^[1] It draws knowledge from several other fields like sociology, anthropology, psychology, economics etc. It is about creating something by thinking across boundaries. It is related to an [interdiscipline](#) or an *interdisciplinary field*, which is an organizational unit that crosses traditional boundaries between [academic disciplines](#) or [schools of thought](#), as new needs and professions emerge. Large [engineering](#) teams are usually interdisciplinary, as a [power station](#) or [mobile phone](#) or other project requires the melding of several specialties. However, the term "interdisciplinary" is sometimes confined to academic settings.
